

Global Geography

Vocabulary

Country

A group of people with a shared government and culture.

City

A large town where people live.

Population

All the people living in a certain place at a certain time.

Region

An area with similar characteristics and features.

County

A small region within the UK.

Human features

Features of the landscape that are made by humans.

Physical features

Features of the landscape that occur naturally.

Landmarks

Places within countries of great historical, cultural or geographical importance.

Grid References

A way to identify a particular place on a map.

India and China both have populations greater than 1.4 Billion!

We are learning to:

- Locate the world's countries, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities.
- Use four and six-figure grid references, symbols and keys.

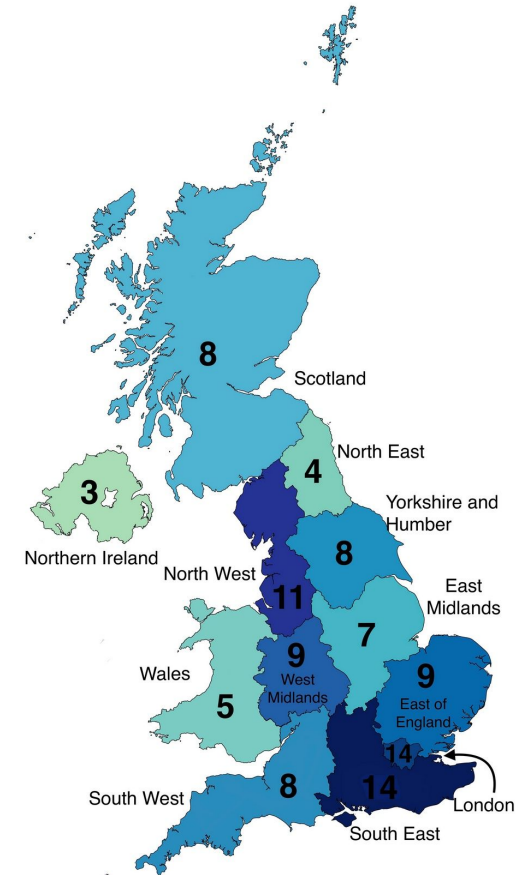

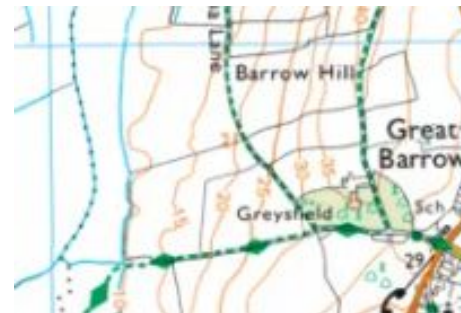

Our Lessons

- To locate the world's most populous and least populous countries.
- To identify what makes London a city and locate others around the world.
- To recognise how population changes between areas in the UK.
- To recognise OS map symbols on a local map.
- To use 6 figure grid references to describe position on a map.

PRIOR LEARNING

- Countries of the UK (KS1)
- Regional Case Studies (Yr 3 and 4)
- Land use and symbols (Yr 3)
- Four figure Grid references (Yr4)

Part of an OS map with grid lines for coordinates

UK Regions
