fuel used to make vehicles move

Pollution

Harmful substances that go into the environment

Railway

track that a train runs on

Sailing boat

a boat which uses sails to catch the wind to make it move

Steam engine

an engine which uses the steam from boiling water to make it move

Transport

carrying people or goods from one place to another

Travel

moving from one place to another

Elephants and camels are used as modes of transport in some parts of the world.

We are learning to:

- Develop an awareness of the past beyond and within living memory
- To sequence events (chronology)
- To ask and answer questions
- To find out about significant individuals

PRIOR LEARNING

- Events from history can be put into chronological order
- People travelled in different ways in the past

Sailing ship

Viking longship - sails and oars were used to move it

A biplane has 2 wings. This type of plane used for the first flight.

Concorde - World's fastest plane

OUR LESSONS

- What is transport?
- What were the earliest forms of transport?
- How has rail travel changed over time?
- How have cars changed over time?
- How has air travel changed over time?
- To compare travel and transport of the past, present and future

Stephenson's Rocket - the first steam railway engine

Penny Farthing - an early type of bicycle. Invented 1865
